Welcome Learners

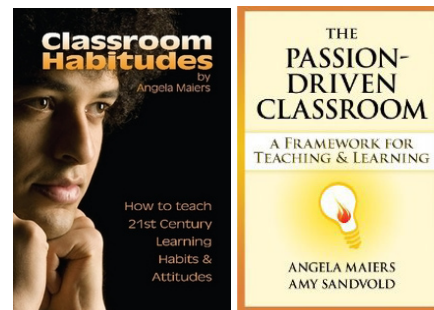

"There are no limits for learners with passion, foresight, and a desire to grow. Technology, used strategically, has the power to leverage human capital and maximize performance of organizations big and small."

- Angela Maiers

Angela Maiers is a consistently energized and recognized worldwide speaker greatly impacting leadership through not only the education field, but the international business community as well. Challenging educational philosophies and business ethics, Angela strives to achieve total synergy and unstoppable energy by reconstructing the thought process of many dated ideologies.

A fresh breath of life to the business and education communities, every inspirational message Angela delivers is tailor made to fit each unique audience and their particular challenges.

With more than 20 years as an educator and ten years on the speaking circuit, Angela has addressed thousands of people worldwide. It is really no wonder Angela is one of the most sought out and frequently requested keynote speakers in the world.

"Angela's professional development work in our district fundamentally changed reading instruction for the better. Student achievement in reading has shown consistent increases over time due to her work with teachers."

~ John Van Pelt, Ed.D. Associate Superintendent Waterloo, Iowa

"I have had the pleasure of working with Angela in several different school districts. Every time she amazes teachers and communicates with clarity complicated concepts such as teaching cognition. Teachers connect with Angela. Administrators respect her expertise. She is in one word, amazing, and I recommend her to any district seeking quality, expert, professional development that will actually make a difference for student learning."

~ Amy Sandvold, Elementary Principal, Waterloo Iowa

Smarter!**

Angela Maiers Keynote Topics

PASSION: THE DIFFERENCE MAKER

We may not walk into our workplace every day thinking, "I'm going to change the world today!" Yet, that is exactly what we do. We DO make a difference. We DO change lives. We CAN change the world. The question we must consider is this: What KIND of difference do we intend to make? This session will provide tools to help you cultivate a thriving and passionate community demonstrating how to sustain energy, excitement, and love for what you do. Passion: the difference maker.

THE HABITUDES: Keys Traits for Lifelong Learning & Success

Creativity, Innovation, Problem Solving... buzz words no longer! To meet the complexities of today's world, we need more than skills and tactics - we need Habitudes! Successful individuals and organizations have identifiable habits and behaviors which allow them to manage emotions, communicate effectively, and sustain themselves in a hyper-competitive and ever changing environment. This session explores intentional lessons and conversations that nurture and develop these habits and attitudes, the Habitudes that ensure success from the classroom to the boardroom.

SOCIAL MEDIA SUPERSTAR - WHO ME?

If you think that Twitter, Facebook, and Blogging is not for you... think again. Social media is here to stay, and burying your head in the sand will leave you, your students, and your organization behind. So let me help you. This session will set the context necessary to guide you as you explore the social platforms, tools, and strategies that will catapult your success in a digital, global learning space.

THE NEW BASICS - LEADERSHIP IN A DIGITAL AGE

In today's world we face technological applications in daily living the likes of which, even a few short years ago, would have been inconceivable. This is a digital age, with interactive devices storing and recording our life experience and containing overwhelming amounts of knowledge. This has become the essence of life in the 21st Century, but more specifically the lives of our children. This session will instill awareness of the importance of the change that is happening today, help educators and organizations understand and re-evaluate current practice, and to provide guidance in how to make change a "want to," not a "have to."

STORY POWER - RECLAIMING THE PLACE OF STORY IN EDUCATION AND LIFE

Great leaders and teachers are natural-born storytellers. Without realizing it, we change lives by the stories we tell, not from the content we dispense. Like weavers, we combine ordinary and significant events alike into stories that tell us who we are and where we belong in our world. When we answer the questions, "Why do we need to know this? Why do we "have to" do this work?," we are telling a story. This engaging presentation will inspire you to embrace your gift as a storyteller and guide you in the process of telling new stories.

This list of keynote topics is not all-inclusive. There are several more topics from which to choose and all can be and are customized to suit audience member and organizational goals. Copyright and Creative Commons Licensing applicable.
